Programming

WORK EXPERIENCE

Computer Vision Data Engineer

Raumschmiede

July 2023 - December 2023

Germany, Ukraine

I was responsible for the development and implementation of a neural network with the help of which we could obtain a complete 3D model of an object from several photos of this object.

Developing an AI-powered system to support elderly care in nursing homes in Germany.

Middle technical specialist

SE Guaranteed Buyer

September 2020

– February 2022

Kiev, Ukraine

My responsibilities included monitoring and complete verification of the technical documentation of an energy facility for the production of “green” electricity, which intends to enter the Ukrainian electricity market and become its full participant.

Junior Frontend\Backend developer

Freelance, UpWork

December 2018 – June 2020

Ukraine, USA, Canada,

Germany

Fulfilling various orders on freelance exchanges, often these were design orders, but sometimes I also had to fulfill orders regarding front-end tasks, and sometimes the backend part including working with sql-databases.
